PROFESSIONAL SUMMARY

Software Engineer Intern (Microsoft) and B.Tech AI & Data Science student with experience in machine learning, generative AI, RAG systems, and automation. Top 7% globally on LeetCode; 1st among 191 participants in a CodeChef Machine Learning Contest.

EDUCATION

Chennai Institute of Technology, Chennai, India 2023 – 2027
B.Tech, Artificial Intelligence and Data Science CGPA: 8.74/10.0
Coursework: Generative AI, Deep Learning, Operating Systems, Software Engineering, DBMS

EXPERIENCE

Software Engineer Intern, Microsoft May 2026 – July 2026
- Engineered an AI-powered anomaly detection pipeline that cut failure triage time by 30%, improving system reliability.
- Automated incident-handling workflows, lowering manual effort by 50% and saving roughly 15 hours per week.
- Implemented service monitoring solutions that shortened mean time to detect and decreased false alarms by 25–30%.

Research Intern, Chennai Institute of Technology Nov 2024 – Dec 2024
- Researched an OS controlled by voice commands, raising response accuracy by 80%.
- Surveyed 10+ chess engines and evaluated 5+ decision-making algorithms.
- Demonstrated that AlphaZero, a deep learning-based approach, improves chess AI decision-making by 40%.

PROJECTS

AI-Powered Legal Contract Review System | Python, RAG, Ollama, Multilingual Voice & Text GitHub | 2025
- Designed a RAG pipeline that answers queries from the contract in 7+ languages and 4 input types (text, PDF, web, image) with clause insights.
- Packaged as a 100% on-device, cross-platform tool (Python, Ollama) so contract data stays private.

TGK Learning: Interactive Data Structures Lab | JavaScript, HTML/CSS, Replit, Netlify Live Demo | 2025
- Built a web platform with 6 interactive visual playgrounds: arrays, linked lists, trees, graphs, hash tables, and heaps.
- Documented pseudocode and time/space complexity for all 6 structures, live on Netlify.

Temporal Image Interpolation Model (FILM) | PyTorch, CUDA, Google Earth Dataset GitHub | 2025
- Trained a frame interpolation model inspired by Google's FILM on 10+ GB of satellite imagery to generate in-between frames.
- Achieved 0.832 SSIM using custom GPU-optimized PyTorch modules with NVIDIA CUDA acceleration.

AI-Powered Feedback Resolution Agent | C#, .NET, Ollama 2025
- Delivered an AI tool that classifies customer comments and suggests improvements, saving 40% of manual effort.
- Streamlined resolution workflows, trimming repetitive handling by 35% and raising satisfaction scores by 20%.

TECHNICAL SKILLS

Languages: C/C++, C#, Python, Java (basics), JavaScript, TypeScript, Go, SQL, HTML/CSS, Dart
AI/ML: PyTorch, TensorFlow, Generative AI, ViT, RAG/CAG, MCP, Ollama
Tools & Platforms: Git, GitHub, Flutter, Firebase, MongoDB, Colab, Linux, CUDA
Core: Data Structures & Algorithms, OOP

CERTIFICATIONS

Google Generative AI (2024); NPTEL Cloud Computing (2024); NPTEL Parallel Computing Architecture (2025); CISCO Cyber Security (2023); CISCO Networking (2023)

COMPETITIVE PROGRAMMING

LeetCode: max rating 1903, 1000+ solved, top 7.48% globally, 10 badges (Knight).
Codeforces: max rating 1295 (Pupil), 70+ solved.
CodeChef: max rating 1670 (3 Star), 240 solved, rank 514 in Starters 172.

ACHIEVEMENTS, OPEN-SOURCE & LEADERSHIP

- Won 1st Rank out of 191 participants in the CodeChef Machine Learning Contest; attained 85%+ accuracy in fuel blending optimization at the Shell Hackathon.
- Published two chess engines and a 7K-parameter spam email classifier (98.4% accuracy) on HuggingFace.
- Taught C programming to juniors (5 classes/week for 1 month); organized Webify AI.
